SMARTER WORKSPACE – BETTER LIFE

Matrix42 Enterprise Manager for SCCM

Accelerate your Microsoft SCCM

What is Matrix42 Enterprise Manager for SCCM?

Microsoft SCCM is the ultimate client management tool for the mid sized and enterprise sector. Matrix42 Enterprise Manager for SCCM makes it simpler to use, and extends its functionality in terms of software deployment, patch management and task delegation. Its benefits can be measured in time, effort and money saved as well as improved user service and satisfaction. In fact, it's the most complete, proven way to simplify SCCM environment management, including full delegation and packaging functionality within one solution, all controlled via a single console.

Why should I use it?

SCCM is a powerful and valuable existing client management investment. Matrix42 Enterprise Manager for SCCM protects that investment and provides an easy way to maximize the return on it by, for example:

- Improving security and compliance
- Simplifying and accelerating Windows 10 rollouts, Microsoft Office updates and software distribution
- Enhancing usability via a single, centralized Web consoleny
- Enabling delegation of repetitive tasks to less specialized IT staff and end users
- Providing Web console access to SCCM
- Simplifying reporting and server management
- Extending SCCM packages and enabling a consistent installation process
- Automatically notifying users about software updates or changes and allowing them to self-schedule

Matrix42 Enterprise Manager for SCCM enables all of this without requiring any specialist SCCM training or interaction with the SCCM interface.

What are my benefits?

IT Managers

- Acceleration of business and IT processes
- 20% faster report creation with no SQL knowledge required
- Graphical progress and compliance reports
- 70% reduction in IT provisioning costs
- 50% reduction in overall training costs
- 50% fewer Service Desk tickets
- 20% faster ticket processing
- Lower costs for own workaround solutions (e.g., scripts, reports, UI, etc.)
- Elimination of third-party patch management solution costs
- Freeing up of specialist SCCM resources to focus on higher value tasks
- Faster, maximized ROI on SCCM
- Happier users through reduced downtime, less disruption, faster service and informed involvement

SCCM administrators

- Faster, easier completion of SCCM tasks through task delegation, simplification and automation
- HTML 5-based Web interface for device-agnostic access and a better user experience
- Less pressure on resources through risk-free, role-based delegation of SCCM tasks to non-IT staff
- Fulfillment of security and compliance requirements
- Reliable real-time rollout monitoring
- 50% faster provisioning of software, patches and operating systems
- 60% faster de-/installation of PCs

That's it!
